A claimant's weekly benefit amount is determined by averaging the wages paid in the two highest quarters of the claimant's base period. To be monetarily eligible for benefits, the claimant's earnings outside the highest quarter in the claimant's base period must be equal or greater than the lesser of six (6) times the claimant's WBA or \$900. A claimant's maximum benefit amount is the lesser of 1/4 the claimant's base period wages or 26 times the claimant's WBA.

50-7-218. Base Period. -- "Base period" means the first four (4) of the last five (5) completed calendar quarters immediately preceding the first day of an individual's benefit year; provided, that if the first quarter of the last five (5) completed calendar quarters was included in the base period applicable to any individual's previous benefit year, such individual's base period shall be the last four (4) completed calendar quarters.
